Target Audience

Local agency staff and consultants who are responsible for environmental procedures and documentation of federally funded projects.

Course Description

This course will give a basic understanding of the **National Environmental Policy Act (NEPA)** and other environmental procedures. The course will predominantly focus on a step-by-step explanation of the **Environmental Classification Summary (ECS)** – the process and documentation requirements associated with each environmental consideration; the triggers for analysis; and, most importantly, the appropriate responses and level of documentation needed to obtain FHWA's approval. The course will also provide updates to any process, regulatory, and guidance changes that have occurred in the past year.

Course Objectives

Upon completion of this course attendees will be able to determine the appropriate NEPA classification for a project; complete an Environmental Classification Summary following the correct environmental procedures; and document environmental commitments and conditions in order to facilitate project review and approval.
